

IN THE SPECIFICATION:

Please amend Para. [0026] as follows:

[0026] The seal portion 56 is substantially cylindrical, but defines two circumferential grooves 70, 72, one of which is illustrated in greater detail in Figure 5. The grooves 70, 72 receive respective O-rings ~~(not shown)~~ 73', 73" of swelling elastomer: one o-ring 73' swells in response to contact with water, while the other 73" swells from contact with oil.
